

Celebrate Summer with

# SOLAR ILLUMINATION

---

Utilize the sustainable power of solar LED lighting and upgrade your outdoor spaces

## MARINAS

Whether you are a large marina or a small one, businesses of all sizes are seizing the financial advantages that solar power has to offer. Not only will it save you money but customers may also be drawn to businesses that put forth an effort to be sustainable.

Whether the CSC LED solar powered flood lights are mounted on the building, the dock, or on a post, they provide a reliable and easy to maintain option for marinas while looking aesthetically pleasing because of the lack of cords and wires.

## COTTAGES

Cottages tend to be a place that people use to escape their busy day-to-day lives and get back to nature. By switching to solar power at your cottage, you can truly achieve this. Not only is this lifestyle appealing to many, but it's a financially responsible decision for your home away from home.

With solar powered lights, you are no longer tied to paying high electrical bills for a property that may only be used seasonally. This also means that no matter how rural your cabin is, you won't be left in the dark due to unforeseen power-outages.

## PATIOS

Backyard lighting can extend the use of your patio and summer enjoyment with family and friends.

The addition of solar powered CSC LED lights will not only provide beautiful illumination and ambiance to your outdoor space, but they can help provide a sense of security with their automatic on / off feature and built-in motion sensor.

SFL-10W-7200-50K

# SOLAR LED FLOOD LIGHT
