

INSTALLATION AT

# ROYAL BOTANICAL GARDENS

CSC LED's 15W FL01 Daymaker Flood/Area lights were recently installed in a stained glass art installation at the Royal Botanical Gardens in Hamilton, Ontario. This unique project required the fixtures to be small enough so that they were not prominent when being viewed during the daylight, but also durable enough to withstand all the elements.

By choosing CSC LED's FL01 Daymaker, they were able to achieve the low-profile look that the customer was looking for, all the while illuminating the stained glass sculpture exactly how they desired.

With our 10-year warranty, our customers can rest easy knowing that our team of dedicated professionals are there to help with any technical or safety questions related to their lighting purchase, no matter how unique the project might be.

WHAT WAS USED

## FL01 DAYMAKER FLOOD / AREA LIGHT

15W | 5000K | 120-277V

- High grade polycarbonate optics that will never yellow
- Includes Lumiled chips, 1m whip, and a versatile yoke mount

NEW GENERATION
